

JavaScript Guide

The JavaScript Guide shows you how to use [JavaScript](#) and gives an overview of the language. If you need exhaustive information about a language feature, have a look at the [JavaScript reference](#).

This Guide is divided into the following chapters.

Introduction

Overview: [Introduction](#)

- [About this guide](#)
- [About JavaScript](#)
- [JavaScript and Java](#)
- [ECMAScript](#)
- [Tools](#)
- [What's next](#)

Grammar and types

Overview: [Grammar and types](#)

- [Basic syntax & comments](#)
- [Declarations](#)
- [Variable scope](#)
- [Variable hoisting](#)
- [Data structures and types](#)
- [Literals](#)

Control flow and error handling

Overview: [Control flow and error handling](#)

- `if...else`
- `switch`
- `try / catch / throw`
- [Error objects](#)

Loops and iteration

Overview: [Loops and iteration](#)

- `for`
- `while`
- `do...while`
- `continue`
- `break`
- `for...in`
- `for...of`

Functions

Overview: [Functions](#)

- [Defining functions](#)
- [Calling functions](#)
- [Function scopes and closures](#)
- [Arguments & parameters](#)
- [Arrow functions](#)

Expressions and operators

Overview: [Expressions and operators](#)

- [Assignment & Comparisons](#)
- [Arithmetic operators](#)
- [Bitwise & logical operators](#)
- [Conditional \(ternary\) operator](#)

Numbers and strings

Overview: [Numbers and strings](#)

- [Numbers](#)
- `Number` object
- `Math` object
- [Strings](#)
- `String` object
- [Template literals](#)

Representing dates & times

Overview: [Representing dates & times](#)

- `Date` object

Regular expressions

Overview: [Regular expressions](#)

- [Creating a regular expression](#)
- [Writing a regular expression pattern](#)
 - [Assertions](#)
 - [Character classes](#)
 - [Groups and backreferences](#)
 - [Quantifiers](#)

Indexed collections

Overview: [Indexed collections](#)

Keyed collections

Overview: [Keyed collections](#)

- [Map](#)
- [WeakMap](#)
- [Set](#)
- [WeakSet](#)

Working with objects

Overview: [Working with objects](#)

- [Objects and properties](#)
- [Creating objects](#)
- [Defining methods](#)
- [Getter and setter](#)

Using classes

Overview: [Using classes](#)

- [Declaring a class](#)
- [Various class features](#)
- [Extends and inheritance](#)
- [Why classes?](#)

Promises

Overview: [Promises](#)

- [Guarantees](#)
- [Chaining](#)
- [Error handling](#)

- [Composition](#)
- [Timing](#)

Typed arrays

Overview: [Typed arrays](#)

Iterators and generators

Overview: [Iterators and generators](#)

- [Iterators](#)
- [Iterables](#)
- [Generators](#)

Internationalization

Overview: [Internationalization](#)

- [Date and time formatting](#)
- [Number formatting](#)
- [Collation](#)

JavaScript modules

Overview: [JavaScript modules](#)

- [Exporting](#)
- [Importing](#)
- [Default exports](#)
- [Renaming features](#)
- [Aggregating modules](#)
- [Dynamic module loading](#)

Advanced topics

After you have learned all fundamental features of JavaScript, you can explore some more niche features, or dive deeper into the language's mechanisms and concepts.

- [Language overview](#)
- [Data structures](#)
- [Enumerability and ownership of properties](#)
- [Inheritance and the prototype chain](#)
- [Equality comparisons and sameness](#)
- [Closures](#)
- [Meta programming](#)

- [Memory management](#)

[Next →](#)

Your blueprint for a better internet.
